

The Global Specialty Foundry Leader

Fact Sheet

Description TowerJazz, the global specialty foundry leader, manufactures integrated circuits, offering the widest range of customizable CMOS specialty wafer processes and providing world-class design enablement tools for the quickest path to design success. TowerJazz’s modular processes enable superior solutions for targeted designs, quickly meeting customer needs and facilitating fast time-to-market for their innovative products. The Company also offers transfer optimization and development process services for IDMs and fabless companies to expand capacity or provide second sourcing. TowerJazz customers are focused on markets including Power Management, Wireless, High-Performance Analog (HPA), Automotive, Medical and Aerospace & Defense, among others. TowerJazz shares are traded on NASDAQ (TSEM) and Tel Aviv Stock Exchange (TSEM).

History In 2011, TowerJazz acquired Micron’s manufacturing facility in Japan to expand its production capacity. Tower and Jazz merged in September 2008 in a stock-for-stock transaction. Jazz Semiconductor was formed in 2002 as a spin-off of Conexant Systems. Tower Semiconductor was founded as a National Semiconductor spin-off and became a public company in 1994.

Facilities TowerJazz offers fab capacity on three continents. Along with its two manufacturing facilities (6" and 8") in Israel and its 8" fab in the U.S., TowerJazz acquired Micron’s 8" Fab in Nishiwaki, Japan in June 2011, nearly doubling its internal capacity. In addition, TowerJazz has access to capacity in China through manufacturing partnerships.

Technology and Design Enablement TowerJazz offers specialty CMOS processes with geometries ranging from 1.0- to 0.13-micron, including: SiGe, BiCMOS, Mixed-Signal & RF-CMOS, CMOS Image Sensor (CIS), Power Management (BCD), and Non-Volatile Memory (NVM) and MEMS capabilities as well as digital CMOS. The Company also offers an industry recognized design enablement infrastructure to provide an environment optimized for analog and RF designs. Unique tools such as Monte Carlo statistical and PCM-based models allow users to maximize the performance-yield tradeoff and provide them with a significant competitive market advantage.

Customers TowerJazz currently serves leading semiconductor companies including:

Conexant	Ikanos	NXP	Teledyne Scientific and Imaging
Cypress Semiconductor	International Rectifier	On Semiconductor	Texas Instruments
DRS Technologies	Intersil	Panavision	VIA Technologies
e2v	Marvell Technology Group	RF Micro Devices	Vishay - Siliconix
Entropic Communications	Medigus Ltd.	Semtech	Zoran Corporation
Freescale Semiconductor	Micron Technology	SiTime Corporation	
Gennum	Mindspeed Technologies	Skyworks Solutions	

Work Force Approximately 3000 employees

Executive Management
Russell Ellwanger, Chief Executive Officer
Itzhak Edrei, President
Ephie Koltin, Executive Vice President of Worldwide Operations
Oren Shirazi, Chief Financial Officer and Senior Vice President of Finance
Dalit Dahan, Senior Vice President of Human Resources and Information Technology
Nati Somekh, Senior Vice President, Chief Legal Officer and Corporate Secretary
Yossi Netzer, Vice President of Corporate Planning
Rafi Mor, Senior Vice President and Newport Beach General Manager
